

BaseModel

```
classDiagram
    class BaseModel
    class models_OcrInfo {
        +engine
        +lang
        +text
        +confidence
    }
    models_OcrInfo --|> BaseModel
```

The diagram illustrates a class hierarchy. At the top is the 'BaseModel' class, represented by a rectangle with three horizontal compartments. The top compartment contains the class name 'BaseModel', while the two lower compartments are empty. Below 'BaseModel' is the 'models.OcrInfo' class, represented by a shaded rectangle with four horizontal compartments. The top compartment contains the class name 'models.OcrInfo'. The second compartment contains a list of four attributes, each preceded by a '+' sign: 'engine', 'lang', 'text', and 'confidence'. The bottom two compartments are empty. A blue arrow with a hollow triangular head points from the top of the 'models.OcrInfo' class to the bottom of the 'BaseModel' class, indicating that 'models.OcrInfo' inherits from 'BaseModel'.

models.OcrInfo

+ engine

+ lang

+ text

+ confidence
