

BaseModel

```
classDiagram
    class BaseModel
    class models_Quality["models.Quality"] {
        + preprocess_steps
        + warnings
    }
    models_Quality --|> BaseModel
```

The diagram illustrates a class hierarchy. At the top is the 'BaseModel' class, represented by a white rectangle with a black border and three horizontal compartments. The top compartment contains the text 'BaseModel', while the other two are empty. Below it is the 'models.Quality' class, represented by a gray rectangle with a black border and three horizontal compartments. The top compartment contains 'models.Quality', the middle one contains '+ preprocess_steps', and the bottom one contains '+ warnings'. A blue arrow points from the top of the 'models.Quality' class to the bottom of the 'BaseModel' class, indicating that 'models.Quality' inherits from 'BaseModel'.

models.Quality

+ preprocess_steps

+ warnings
