

BaseModel

```
classDiagram
    class BaseModel
    class models_Totals {
        + subtotal
        + vat_total
        + total
    }
    BaseModel <|-- models_Totals
```

The diagram illustrates a class hierarchy. At the top is the 'BaseModel' class, represented by a white box with a black border and three horizontal compartments. The top compartment contains the text 'BaseModel', while the other two are empty. Below it is the 'models.Totals' class, represented by a gray box with a black border and three horizontal compartments. The top compartment contains the text 'models.Totals', the middle compartment contains a list of attributes: '+ subtotal', '+ vat\_total', and '+ total', and the bottom compartment is empty. A blue arrow points from the top of the 'models.Totals' box to the bottom of the 'BaseModel' box, indicating that 'models.Totals' inherits from 'BaseModel'.

models.Totals

+ subtotal

+ vat\_total

+ total
